

LEN-600 Series

LEN-600 is a high phosphorus, Electroless Nickel bath. It replaces stainless steel by plating over carbon steel at a savings of up to 30%.

LEN-600 Plating

Stainless Steel

Meets or exceeds
these standards:

RoHS	✓
Aerospace	✓
ASTM B (E.N. Specs)	✓
FDA Approved for Medical Market	✓
Down Hole Tool for Oil Industry	✓

The high price of nickel has made stainless expensive. LeKem's LEN-600 solves the problem with **just .0004 tenths of plating** over carbon steel. LEN-600 is approved for 100 hours of salt spray, 10 MTOs, and is in compression with up to a 60,000 psi bond.

We will plate prototypes for you, or setup a line in your plant, just give us a call at 866-932-5536.

We also offer a free trial bath (up to 1 MTO), or send us a sample and we'll plate it for free.
